Goal & Objectives

Goal:

- The goal of this project is to initiate an AI for climate science data discovery.

Objectives

1. Get the current status of recommender (knowledge graph technologies).
   - Identify software criteria (Attributes)
2. Register Softwares into TDIS Ontosoft
3. Register Data sources.
   - Identify Data Source Criteria (Attributes)

Logic Model for Team Semanta 🤖

The goal of this project is to initiate an AI for climate science data discovery.

Resources	Activities	Outputs/Metrics	Short-term outcomes	Primary outcome	Impact
Awesome Team Will Akila Lydia	Software Data Search	Was search successful? # found	Wednesday: Completion of initial data search & Criteria	2 databases	Start of Searchable database
	Criteria Identification Workshop	Semanta 🤖 Group Agreement! Huzzah!	Thursday: Input data		Better understanding of available tools
Software Repository Ontosoft	Software/Data Entry Marathon!	# Software/Datasets Registered	Friday: Presentation
