Goals and Logic Modeling

Goal Setting template - Tuesday afternoon

1. Team break out rooms
2. Start with your ending visual that you co-created in your team yesterday afternoon
3. Revise & update the visual if needed to be sure everyone agrees on how their research can be linked (10 minutes)
4. Write a project goal, with SMART objectives. Use the template. (20 minutes)
5. Do a logic model. Use the template. (20 minutes)
6. Return to the Zoom main room.

   Remember – turn taking and active listening!

Logic model template - Tuesday afternoon

Barriers:
1. Definitions
2. Merging perspectives/interpretations
3. Team makeup/background

Aids:
1. Communication
2. Fresh perspective

Share and Link Your Research

1. Individuals organize their 'messy' thinking by creating a visual
2. Turn-taking – individuals explain their thinking using the visual (5 mins each)
3. Individuals jot down potential linkages on-the-fly
4. Turn-taking – Individuals share their potential linkage list
5. The team starts from scratch co-creating a visual that incorporates one or more linkage – stop by 2:30
6. Team reflection on the process – what was difficult and what helped? List 3-5 barriers and 3-5 aids
